

Current transformers for meters with source verification

Description

Current transformers used in Low Voltage installations, in applications with official measurements and used to bill energy, since they comply with the specifications of the Spanish electricity companies. Resin is used as an exterior insulation element to provide a set of characteristics that increase the quality of the transformer when compared to other conventional insulation systems.

The most important properties of this type of insulation are:

- High mechanical resistance
- Great dielectric strength
- Self-extinguishing (VO Degree)
- Tropicalization
- Impossibility of tampering with the transformer, preventing any form of access to the internal elements.

Applications

- Current transformers for energy meters. Used in Low Voltage installations.

Technical features

		TRMC 210	TRMC 400
Electrical features	Class	0,5 → 10 VA 0,5S → 2,5 VA 0,5S → 10 VA	0,5 → 10 VA 0,5S → 10 VA
	Maximum operating voltage	0,72 kV~	0,72 kV~
	Primary current	100...1000 A	750...3000 A
	Secondary current	5 A	5 A
	Insulation voltage	3 kV	3 kV
	Safety factor	F _s < 5	F _s < 5
	Frequency	50 / 60 Hz	50 / 60 Hz
	Thermal class	B	B
	Thermal short-circuit current	I _{th} = 60 I _n	I _{th} = 60 I _n
	Dynamic current	I _{dyn} = 2,5 I _{th}	I _{dyn} = 2,5 I _{th}
Mechanical features	Encapsulation	In resin (wound primary)	In resin (wound primary)
	Dimensions	145 x 11 x 48 mm	160 x 99 x 68 mm
	Weight	2,5 VA → 1,5 kg 10 VA → 1,6 kg	2,5 VA → 1,4 kg 10 VA → 1,5 kg
Standards	IEC 60044-1, UNE EN 60011-1
